GoBeauty feels strongly about offering consumers products that are scientifically proven. The before and after pictures are taken from a recent clinical study conducted in New York City at an FDA recognized clinical research facility.

The clinical study required subjects to use GoNails Natural Growth Nail Treatment twice per day for three weeks. Subjects were between 18 and 50 years of age. Subjects were required to fill out questionnaires on nail health and nail care at the beginning and at the end of the study.

In addition, photographs were taken at baseline and 10 and 20 days into the study.

Further clinical trials are planned and we will continue to update our site with the trial results as they become available. In addition, we encourage you to send us your stories and photographs of your own results.
